[Package Checklist]

Please check the integrity of package and accessories while first using the Ethernet media converter rack.

- I. Ethernet media converter rack x 1 2. Power cord
- 3. Quick Installation Manual
- 4. CD

5. Warranty card

6. Certification

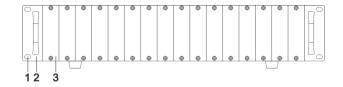

If any of these items are damaged or lost, please contact our company or dealers, we will solve it ASAP.

[Product Overview]

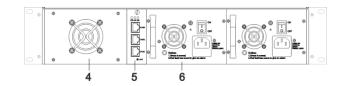

The product is a managed 16 slots card Ethernet media converter 2U rack. The model is RACK2000C (16 slots card).

[Panel Design]

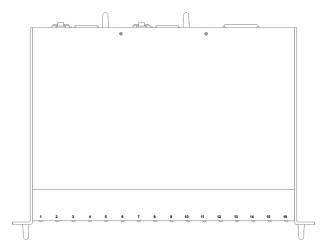

Front view

Rear view

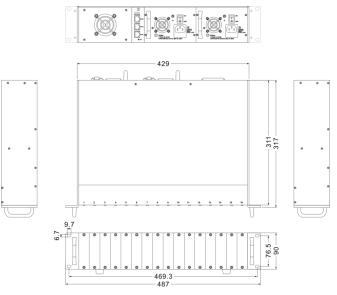

Top view

- 1. Mounting lug
- 2. Handle
- 3. Damper (place the card device)
- 4. Fan module
- 5. Management card
- 6. Power supply module

[Mounting Dimension]

Unit: mm

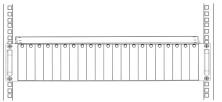

Note before mounting:

- Don't place or install the device in area near water or moist, keep the relative humidity of the device surrounding between 5%~95% without condensation.
- Before power on, first confirm the supported power supply specification to avoid over-voltage damaging the device.
- The device surface temperature is high after running;
 please don't directly contact to avoid scalding.

[Mounting Rack]

Install the device

- Step 1 Select the device installation location to reserve sufficient size.
- Step 2 Place the device on the surface plate of the rack; adopt 4 screws to install the mounting lugs on the left and right sides on the rack.

Step 3 Check and confirm the product is firmly installed on the rack, then mounting ends.

Disassemble the device

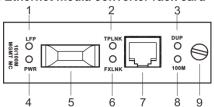

Step 1 Device power off.

Step 2 Unscrew the fixing screw

Step 3 Remove the device from the rack, disassembling ends.

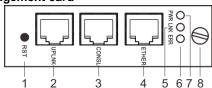

Coptional Daughter Card

100M Ethernet media converter rack card

- 1. Link disconnection alarm indicator (LFP)
- 2. Copper port connection status indicator (TPLNK)
- 3. Copper port duplex mode indicator (DUP)
- 4. Power suplly connection status indicator (PWR)
- 5. 100M fiber port
- 6. Fiber port connection status indicator (FXLNK)
- 7. 100M copper port
- 8. Copper port 100M rate indicator (100M)
- 9. Screw

Management card

- 1. Restore factory defaults button (RST)
- 2. Cascade interface is used for cascade card connection
- 3. Console port
- 4. 100M copper port
- 5. Copper port connection status indicator (LNK)
- 6. Alarm indicator (ERR)
- 7. Power supply connection status indicator (PWR)
- Screw

[RST Button]

Management card provides restore factory defaults button (RST). When the management card power on, press the RST button for about 20 seconds, the management card will automatically restore factory defaults (factory default IP address 192.168.1.251, subnet mask 255.255.255.0, gateway 192.168.1.1).

[DIP Switch]

100M Ethernet media converter rack card supports 8 pins DIP switches, the

DIP	Status	Description
1	ON	Copper port auto negotiation function
		is disabled
	OFF	Copper port auto negotiation function
		is enabled (default)
2	ON	Copper port is half duplex
	OFF	Copper port is full duplex (default)
3	ON	Copper port 10M
	OFF	Copper port 100M (default)
4	ON	LFP function is enabled
	OFF	LFP function is disabled (default)
5	ON	Remote control is disabled
	OFF	Remote control is enabled (default)
6	ON	Pass-through mode
	OFF	Store and forward (mode)
7-8	-	Reserved

[Power Supply Connection]

AC power supply

Professional communication power supply is embedded in the rack, which supports single and dual power supply optional. Dual power supply device, when one power supply fails, it can

immediately switch to another power supply to ensure the device continuous power supply. Power supply input range: $100\sim260\text{VAC}$.

[Indicator]

100M Ethernet media converter card

Туре	LED	Status	Description
	FXLNK	ON	Fiber port link is connected
Fiber			well
port		Blinking	Data is transmitted
port		OFF	Fiber port without data
			transmission or link fails
	100M	ON	100Mbps
		OFF	10Mbps or out of service
	TPLNK	ON	Copper port link is
Connor			connected well
Copper		Blinking	Data is being transmitted
port		OFF	Copper port without data
			transmission or link fails
	DUP	Blinking	Full duplex mode
		OFF	Half duplex mode
	LFP	ON	Link disconnection alarm
Alarm			function is enabled
Alailii		OFF	Link disconnection alarm
			function is disabled
Power	PWR	ON	Power supply is normal
		OFF	Power supply is not
supply			powered or fails

Network management card

Туре	LED	Status	Description
Copper port	LNK	ON	Fiber port link is connected
			well
		Blinking	Data is transmitted
		OFF	Fiber port without data
			transmission or link fails
Alarm	ERR	ON	Except for lighting during
			power on

Туре	LED	Status	Description
		OFF	No alarm
Power supply	PWR	ON	Power supply is normal
		OFF	Power supply is not powered
			or fails

[Specification]

Panel	
Conner nort	10/100Base-T(X), RJ45
Copper port	interface
Fiber port	100Base-FX fiber port is full
Fiber port	duplex SC/ST/FC interface
Canada nort	Debugging port (RS-232), RJ45
Console port	interface
	Power supply indicator, rate
Indicator	indicator, duplex indicator,
indicator	copper port indicator, fiber port
	indicator
Power supply	
Input power supply	100~260VAC, 50~60Hz
Output power supply	5VDC
Consumption	
Full load consumption	< 60W
Working environment	
Working temperature	0~50℃
Storage temperature	-10~70℃
Working humidity	5%~90% (no condensation)
